

# *Current Topics in Biophysics*

## CONTENS

<b>Jan Gomulkiewicz, Michał Bartoszkiewicz, Stanisław Mięksisz -</b> Some Remarks On Ion Transport Across Excitable Membranes. 1. The Stationary State .....	3
<b>Danuta Frąckowiak -</b> Application Of Photothermal Methods In Biophysics And In Medicine .....	11
<b>Andrzej Makowski, Władysław Wardas -</b> Photocatalytic Degradation Of Toxins Secreted To Water By Cyanobacteria And Unicellular Algae And Photocatalytic Degradation Of The Cells Of Selected Microorganisms .....	19
<b>Bogdan Chmiel, Bolesław Turczyński, Stanisław Szczęsny, Lech Cierpka, Krzysztof Zagalski, Ludmiła Słowińska -</b> The Influence Of A Nitrogen Oxide On Erythrocyte Deformability In Rats Exposed To Stress Of Water Immersion .....	27
<b>Tadeusz Janas, Teresa Janas, Krzysztof Nowotarski -</b> The Role Of Polyprenol In Modulation Of Physical Properties Of Model Membranes .....	33
<b>H. Ti Tien, Angelica L. Ottova -</b> Hydrogen Generation From Water Using Semiconductor Septum Electrochemical Photovoltaic (Sc-Sep) Cells .....	39

2001, vol.25(1)

Janusz Sławiński  
Michał Kurzyński  
Genowefa Ślósarek

**Current Topics in Biophysics**

publishes the original biophysical research in English. Reviews (in English or in Polish) and theoretical articles are also accepted.

**Manuscripts** should be submitted in duplicate to Prof. Andrzej Dobek, Molecular Biophysics Division, Faculty of Physics, A. Mickiewicz University, Umultowska 85 61-614 Poznań, Poland.

**Subscription** orders should be sent to ZARZĄD GŁÓWNY of the Polish Biophysical Society, Katedra Biofizyki Akademia Medyczna, ul. Chałubińskiego 10, 50-368 Wrocław and to Wydawnictwo Poznańskie, Spółka z o.o., 61-701 Poznań, ul. Fredry 8. Annual subscription rate: US 20\$ for individual subscribers and US 30\$ for Institutions. Additional rate for airmail: US 5\$ (Europe) or US 10\$ (overseas countries)

---

The publication of this journal is aided by Polish Committee for Scientific Research.

## INFORMATION FOR CONTRIBUTORS

### I. General

1. The editors of the *Current Topics in Biophysics* are prepared to accept direct experimental reports, reviews and theoretical articles. Papers submitted may deal with any problems related to biophysics.
2. Papers should be submitted in English to:  
**Prof. Andrzej Dobek, Department of Biophysics, Adam Mickiewicz University of Poznań,  
Umultowska 85, PL-61-614 Poznań, Poland.**  
The submission of the manuscript is regarded as the author's statement that it has not been published (or submitted for publication elsewhere).

### II. Specific

1. Manuscripts and illustrations should be submitted in duplicate. Double-spaced typing and at least 2 cm margins are required. The length of manuscript is not limited.
2. The first page must include: the title; name of author(s); affiliation(s); short running title (no more than 50 characters, including spaces); a detailed address for correspondence.
3. References should be cited in the text by giving the last name of the author (or authors) followed by the year of publication in parentheses, e.g. Reich (1970), Liboff and Furst (1974). If there are three or more authors, citations, need give only the first author, e.g. Pineri, Escobues and Roche (1978) becomes Pineri *et al.* (1978). If there is more than one work by the author (or authors) in a given year, label them alphabetically within each year, e. g. Lang (1966a, 1966b).
4. The full list of references should be typed on a separate. It should include the names of all the authors and their initials, the year of publication in parentheses, the full title of the article or book, the standard abbreviated name of the journal, the volume number and the pages; and, for books, the city of publication and the publisher. The following may serve as illustrations:

Stepień K. & Wilczok T. (1982). Studies of the mechanism of chloroquine binding to synthetic DOPA-melanin. *Biochem. Pharmacol.*, **31**, 3359-3365.

Gennis R. B. (1989). *Biomembranes. Molecular structure and functions*. Springer-Verlag: New York.

Frackowiak D., Planner A. & Wiktorowicz K. (2001c). Near-infrared applications in medicine. [In:] Raghavachari R. & Dekker M. (Eds.), *Near-Infrared Applications in Biotechnology* (pp. 151-184). New York, Brasel: M. Dekker.

5. All photographs, graphs and diagrams should be referred to as „Figures” (abbreviated to „Fig”) and should be numbered consecutively. The proper sites for their insertion should be indicated in the text. The legends should be typed, correspondingly, on a separate page. The author's name, figure number, and an indication of its proper orientation should be indicated on the back of each figure. Tables should be numbered consecutively in Arabic numerals.
6. If a manuscript is accepted for publication, electronic files will then have to be submitted for both the text and the graphics. If, for some reason, the electronic file for a figure cannot be used, the hard copy will be scanned. Scanning produces best results from simple line art, so authors may wish to design figures that do not include textures and halftones, which do not reproduce well when scanned. Authors who want to avoid having to recreate their figures if their article is accepted should note that the preferred format for electronic graphics files is EPS, although TIFF is a good alternative. Also, figures need to be saved at a resolution of at least 300 dpi. It is therefore advisable not to create figures using presentation application software (e.g., PowerPoint) or other software that does not allow files to be saved in EPS or TIFF format at a high resolution.
7. The cost estimate of 100 reprints will be sent to the author for his approval after submission of the manuscript. Moreover, authors can obtain a free of charge a pdf file with their contribution.
