

## CONTENTS

**[2-3] – Preface**

Czesław Rudowicz, Ireneusz Stefaniuk, Kazimierz Dzieliński

**[4] – Announcement on Polish EMR Group for CTB**

Czesław Rudowicz

**[5] – Foreword to the Commemorative Section**

Krystyna Dyrek

**[6-11] – The profile of Professor Jan Stankowski - family and scientific remembrances**

Małgorzata Trybuła, Zbigniew Trybuła

**[12-14] – My cooperation with Jan Stankowski**

Stefan Wapłak

**[15-19] – Snapshots from APES'04 - Prof. Jan Stankowski in Bangalore**

Czesław Rudowicz

**[21-25] - Electron paramagnetic resonance study of thermally generated radicals in native and modified starches**

Ewa Bidzińska, Krystyna Dyrek, Elżbieta Wenda

**[27-31] – Comparison of EPR and magnetic susceptibility measurements of lithium niobate crystals weakly doped with rare-earth ions**

Tomasz Bodziony

**[33-37] – The hemoglobin deformation induced by near infrared radiation – spin label study**

Urszula Cytlak, Małgorzata Dzik, Tomasz Walski, Katarzyna Gałęcka, Małgorzata Komorowska

**[39-42] – Electron spin resonance (ESR) as a method to estimate the time of blood extravasation in forensic medicine**

Hanna Domek, Leszek Sagan, Jarosław Piątek, Bolesław Gonet

**[43-45] – Broad-band ferromagnetic resonance in thin magnetic films and nanostructures**

Janusz Dubowik, Hubert Głowiński

**[47-53] – Development of EPR systems – solution of Wrocław University of Technology**

Jan Duchiewicz, Andrzej Dobrucki, Andrzej Francik, Tomasz Duchiewicz

**[55-60] – EPR spectroscopy of iron azaporphyrins**

Kazimierz Dzieliński, Tomasz Kaczmarzyk, Tomasz Jackowski

**[61-64] – Multiphoton transient EPR nutations in a doubly resonant bichromatic field**

Ryhor Fedaruk, Alexander P.Saiko, Sergey A.Markevich

**[65-67] – Superposition model analysis of the zero-field splitting parameters of  $\text{Fe}^{3+}$ : TLBX<sub>2</sub> crystals – insight into local distortions and low symmetry aspects**

Paweł Gnutek, Muhammed Açıkgöz, Czesław Rudowicz

[69-71] – **Technique of optically detected magnetic and cyclotron resonances – basics and applications**

Marek Godlewski, Vitaly Yu.Ivanov

[73-76] – **Free radicals of the pine needles as an indicator of damage to forests caused by car exhaust gases**

Bolesław Gonet

[77-80] – **FMR study of magnetic nanoparticles embedded in non-magnetic matrices**

Niko Guskos, Janusz Typek, Grzegorz Zolnierkiewicz

[81-85] – **Study on organic radicals giving rise to multicomponent EMR spectra in dried fruits exposed to ionizing radiation**

Grzegorz P.Guzik, Waław Stachowicz, Jacek Michalik

[87-93] – **EPR study of phase transitions in DMAAIS and DMAGaS crystals**

Ryszard Hrański, Monika Jackowska, Zbigniew Czapla

[95-98] – **Spin trapping and radical scavenging methods in studies of bioglycerol**

Maria Jerzykiewicz, Irmina Ćwieląg-Piasecka, Maciej Witwicki, Adam Jezierski

[99-102] – **EPR and DFT studies on heterometallic polynuclear compounds and Pb(II) complexes with semiquinone radicals**

Julia Jezierska, Andrzej Ożarowski, Vladimir N.Kokozay , Olga Yu.Vassilyeva , Elena A.Buvaylo, Valeriya G.Makhankova, Maciej Witwicki , Maria Jerzykiewicz

[103-108] – **EPR characterization of new cadmium, zinc and rare-earth tungstates and molybdates**

Sławomir M.Kaczmarek, Hubert Fuks, Grzegorz Leniec, Tomasz Skibiński, Anna Jasik, Elzbieta Tomaszewicz, Tadeusz Groń

[109-112] – **Spin localization in ACF detected with EPR**

Mateusz Kempniński, Wojciech Kempniński, Maria Augustyniak-Jabłokow, Małgorzata Śliwińska-Bartkowiak

[113-117] – **ESR spectra for high-spin systems under arbitrary motion conditions**

Danuta Kruk, Aleksandra Kubica

[119-124] – **Electronic spin resonance detection of hydroxyl radicals and singlet oxygen during peroxidation of bopindolol in the presence of copper ions**

Irena Kruk, Teresa Michalska

[125-128] – **<sup>1</sup>H nuclear magnetic relaxation dispersion as a source of information on electron spin relaxation**

Danuta Kruk, Agnieszka Milewska

[129-134] – **Magnetic resonance in ferromagnetic diluted magnetic semiconductors**

Marian Kuzma, Ireneusz Stefaniuk, Mariusz Bester

[135-140] – **EPR study of three copper(II) Schiff base complexes**

Grzegorz Leniec, Janusz Typek, Sławomir M.Kaczmarek, Anna Szady-Chelmieńska

[141-146] – **Influence of cadmium and selenium on photosynthesis activity of rape and wheat plants studied by EPR**

Maria Łabanowska, Ewa Bidzińska, Maria Filek

[147-152] – **Different types of paramagnetic complexes and size manifestation in EPR measurements of small carbon particles**

Szymon Łoś, Laurent Duclaux, Wojciech Kempniński

[153-156] – **Spin trapping study of the influence of taxifolin on Fenton reaction in ethanol and methanol**  
Katerina Makarova, Katarzyna Łastawska, Katarzyna Zawada, Iwona Wawer

[157-161] – **Coordinate systems for determining the electron spin resonance (ESR) lineshape**  
Lidia Najder-Kozdrowska, Andrzej B. Więckowski

[163-170] – **EPR spectroscopy of the radiation-induced paramagnetic centers in glasses**  
Bohdan V. Padlyak

[171-175] – **EPR spectroscopy of tetraborate glasses doped with Mn and Cu**  
Bohdan V. Padlyak, Adam Drzewiecki, Oleksandr O. Smyrnov

[177-181] – **Alterations in human red blood cell membrane properties in Alzheimer disease patients**  
Anna Pieniążek, Robert Hajduk, Michał Popiński, Elżbieta Poziomska-Piątkowska, Krzysztof Gwoździński

[183-187] – **The EPR examination of free radicals formation in thermally sterilized  $\beta$ -lactam antibiotics**  
Paweł Ramos, Barbara Pilawa

[189-193] – **Modeling in EMR spectroscopy - low symmetry aspects**  
Czesław Rudowicz, Paweł Gnutek

[195-198] – **Spectroscopic properties of  $\text{Fe}^{2+}$  ( $s=2$ ) ions at tetragonal sites in  $\text{K}_2\text{FeF}_4$  and  $\text{K}_2\text{ZnF}_4$**   
Czesław Rudowicz, Danuta Piwowarska

[199-202] – **EPR of  $\gamma$  - irradiated  $\text{CsH}_3(\text{SeO}_3)_2$**   
Nikolaj Sergeev, Oleg Falaleev

[203-207] – **Temperature dependence of EPR/FMR spectra of carbon coated nickel nanoparticles and tempo spin probe dispersed in paraffin**  
Marcin Soboń, Ignacy-Eryk Lipiński, Urszula Narkiewicz, Mariusz Podsiadły

[209-215] – **EPR spectroscopy interfaced with DFT calculations – a powerful approach to study paramagnetic species in heterogeneous environments**  
Zbigniew Sojka, Piotr Pietrzyk

[217-220] – **Computer program SPM-MC and its applications in EMR studies of transition ions in crystals**  
Ireneusz Stefaniuk, Czesław Rudowicz

[221-226] – **Magnetic properties of zinc-oxide composite doped with transition metal ions (Mn, Co, Cr)**  
Ireneusz Stefaniuk, Bogumił Cieniek, Igor Virt

[227-230] – **The EPR measurements of  $\text{Al}_2\text{O}_3$  powders and mullites used in aerospace industry for cores and shapes**  
Ireneusz Stefaniuk, Piotr Potera, Józef Cebulski

[231-235] – **EPR investigations of defects in  $\text{Bi}_{12}\text{GeO}_{20}:\text{Cr}$  single crystal irradiated by high energy uranium ions**  
Ireneusz Stefaniuk, Piotr Potera, Iwona Rogalska, Dagmara Wróbel

[237-243] – **Competing magnetic interactions and low-dimensional effects in EMR spectra of  $(\text{R}_x\text{Y}_{1-x})_2\text{Cu}_2\text{O}_5$  solid solutions**  
Janusz Typek

[245-251] – **Magnetic resonance study of phases from Sb-V-O and Sb-V-Mo-O systems**  
Janusz Typek, Elżbieta Filipek, Niko Guskos

[253-256] – **Ferric materials studied by EPR**

Stefan Wapłak, Adam Ostrowski

[257-262] – **Electron spin resonance in semiconductors**

Zbysław Wilamowski, Agnieszka Wołoś, Hanka Przybylińska

[263-266] – **EPR spectroscopy of ferroelastics**

Włodzimierz Zapart, Maria B. Zapart

[267-269] – **Antioxidant capacity of serum measured using tempo scavenging assay in patients with rheumatoid arthritis**

Katarzyna Zawada, Joanna Celińska, Ewa Matyska-Piekarska, Iwona Wawer, Jan K. Łącki

53 – [271-275] – **EPR studies of *Cladosporium cladosporioides* mycelium with flucytosine**

Magdalena Zdybel, Barbara Pilawa, Ewa Buszman, Teresa Witoszyńska, Honorata Cieśla

[277-281] – **Magnetic frustration in M-Fe-V-O system**

Grzegorz Zolnierkiewicz, Niko Guskos, Janusz Typek

[283-286] - **Contents**
