Current Topics in Biophysics (Zagadnienia Biofizyki Współczesnej) vol. 33 (suppl B), 2010

CONTENTS

[1-4] – **Title pages**

[5-17] – **Plenary lectures**

[5] - **Free radicals: signaling and damaging functions in aging. Is Harman's free radical theory of aging correct?**
I. Afanas'ev

[5] - **Proteins as double agents for reactive oxygen species**
G. Bartosz, J. M. Gebicki

[5] - **Factors affecting the size of cells**
T. Biliński

[6] - **Mechanisms of sulfur radical cations stabilization relevant to oxidation of peptides and proteins containing methionine**
K. Bobrowski, G. L. Hug, D. Pogocki, G. Hörner, P. B. Wiśniowski, B. Marciniak, C. Schöneich

[6] - **Age-related changes in photo-protective and antioxidant properties of retinal pigment epithelium melanin**
J. Burke, T. Sarna, G. Szewczyk, M. Zaręba, A. Żądło

[6] - **Redox controlled activation of integrin receptors**
C. S. Cierniewski, G. Padula, M. Swiatkowska

[7] - **EPR biodosimetry – fundamentals, applications and perspectives**
B. Ciesielski

[8] - **Ion channels in mitochondria – the matter of life and death**
K. Dołowy

[9] - **Structural, geometrical and magneto-optical features of iron-dextran complex**
B. Graczykowski, A. Dobek

[9] - **Spectroscopy of photosynthetic antenna complex LHCII**
W. I. Gruszecki, M. Zubik, R. Luchowski, M. Gospodarek, W. Grudziński, E. Janik, J. Goc, J. Szurkowski, Z. Gryczynski, I. Gryczynski

[9] - **Do lipid rafts mediate the drug actions?**
A. B. Hendrich, M. Kicia, O. Wesołowska

[10] - **The biological chemistry of HNO and its interactions with thiol-containing proteins**
S. B. King

[10] - **Effects of electric fields upon cells**
W. Korohoda

[10] - **Molecular mechanism of xanthophyll cycle**
D. Latowski, S. Schaller, M. Jemioła-Rzemińska, R. Goss, K. Strzałka

[11] - **Causal analysis of molecular dynamics events. A novel strategy to a better understanding of biomolecular systems**
B. Lesyng

[11] - **Organization of cell surface proteins: distribution of HLA-I on lymphoid cells**
L. Mátyus, J. Kormos, G. Szentesi, S. Varga, A. J. Veres, A. Jenei

[12] - **Interaction of biologically active stilbenes and flavonoids with membranes**
K. Michalak, O. Wesołowska, J. Wiśniewski, M. Kużdżał, J. Strancar, N. Duarte, M. J. U. Ferreira

[12] - **Uracil in DNA – its biological significance**
R. Oliński, M. Jurgowiak, T. Zaremba

[12] - **Mitochondrial actions of melatonin: preserving an optimal redox balance**
R. J. Reiter

[13] - **4-Hydroxynonenal (HNE) metabolism and its age dependency**
W. Siems

[13] - **P-chiral analogues of oligonucleotides**
W. J. Stec

[14] - **Reactivity between gold nanoparticles and bioactive molecules**
J. Tournebize, A. Sapin-Minet, A. Boudier, R. Schneider, G. Bartosz, P. Maincent, P. Leroy

[14] - **Kinetic chemiluminescence as a tool to study the mechanisms of free radical reactions and antioxidant effects**
Yu. A. Vladimirov

[15] - **Biophysics supports development in biomaterials engineering**
B. Walkowiak

[15] - **Searching for the primary photoeffect of the light therapy**
T. Walski, K. Grzeszczuk, S. Olsztyńska-Janus, K. Gałecka, K. Szymborska-Małek, M. Komorowska

[15] - **Plasma membrane lipid-raft organization and cell cycle perturbation in osteosarcoma 143b cells exposed to natural and synthetic antioxidants**
M. Woźniak

[16] - **Qualitative and quantitative mapping of elements by energy-dispersive microanalysis in transmission electron microscopy**
E. Wyroba, R. Bartosiewicz

[16] - **Role of mitochondrial dysfunction in diabetes. Corrections of mitochondrial disorders in diabetes by melatonin and succinate**
I. B. Zavodnik, I. K. Dremza, E. A. Lapshina, V. T. Cheshchevik, S. V. Zabrodskaja, M. Bryszewska

[17] - **VO_2 kinetics during exercise – relationship with muscle fatigue**
J. A. Żołądź

[19-66] - **Posters**

[19-29] – **Posters A-I**

[19] - **Antioxidative and sun protective properties of natural compounds applied in cosmetics**
J. Adamczyk, A. Deda, S. Wilczyński, M. Dybel

[19] - **Intermolecular interactions in the aggregated forms of carotenoid pigments**
P. Adamkiewicz, A. Sujak, W. I. Gruszecki

[19] - **The effect of K^+ and Na^+ ions on the aggregation of antibiotic amphotericin B in the lipid membranes**
M. Arczewska, M. Gagoś

[20] - **Verification of an atomistic computer model of the thylakoid membrane**
K. Baczyński, M. Pasenkiewicz-Gierula

[20] - **Melatonin applied into the cucumber seeds modifies antioxidant enzymes activity during germination**
M. Bałabusta, M. M. Posmyk, K. M. Janas

[20] - **Effect of safeners on erythrocyte hemolysis induced by herbicides**
J. Bernasińska, P. Duchnowicz, M. Koter-Michalak

[21] - **Oxidative stress induced in erythrocytes by herbicides – effect of safeners**
J. Bernasińska, P. Duchnowicz, M. Koter-Michalak

[21] - **Toxicity of tin organic compounds towards erythrocyte membrane**
D. Bonarska-Kujawa, S. Przestalski, H. Kleszczyńska

[22] - **Effect of extracts from *Uncaria tomentosa* on survival, morphological changes and the process of apoptosis in human lymphocytes**
M. Bors, B. Bukowska, J. Michałowicz, R. Pilarski, K. Gulewicz, P. Sicińska

[22] - **Hemolysis induction and hemoglobin oxidation in red blood cells incubated with extracts from *Uncaria tomentosa***
M. Bors, B. Bukowska, R. Pilarski, K. Gulewicz

[22] - **Interaction of xanthohumol and isoxanthohumol with phosphatidylcholine bilayers**
J. Bronowicka-Gąsiorowska, O. Wesołowska, K. Michalak

[23] - **Antioxidant potency of extracts from leaves of fruit trees and bushes**
S. Cyboran, J. Oszmiański, H. Kleszczyńska

[23] - **Effect of quercetin on oxidative stress induced in MCF-7 breast cancer cells by doxorubicin and taxanes**
M. Czaplińska, K. Gwoździński, A. Koceva-Chyła

[24] - **The *in vivo* effect of nitroxide Pirolin and anticancer drugs doxorubicin and docetaxel on activity of antioxidant enzymes in rat heart**
J. Czepas, J. Piasecka-Zelga, A. Koceva-Chyła, K. Gwoździński

[24] - **Spectroscopic studies of antioxidative properties of cosmetics**
A. Deda, S. Wilczyński, B. Pilawa, E. Pierzchała

[24] - **Influence of some aliphatic tin compounds on the electrical properties of model membranes**
G. Engel, M. Podolak, D. Man

[25] - **DNA damage and repair in cancer cells – comparison of anthracyclines of Ist and IInd generations**
A. Gajek, A. Rogalska, A. Koceva-Chyła

[25] - **Is it possible to store platelets at low temperature?**
K. Gałecka, T. Walski, K. Grzeszczuk, M. Komorowska

[26] - **The influence of the hydroxyproline content on the denaturation temperature of collagen**
M. Gauza, L. Kubisz

[26] - **The extract from parasitic fungi used in the unconventional medicine affect the red blood cells by disruption of the membrane structure**
M. Grosbart, A. Robaszkiewicz, M. Soszyński

[26] - **The photoacoustic profilometer**
M. Grzegorczyk, J. Szurkowski

[27] - **Analysis of voltage pulsations caused by hydrodynamic instabilities in near membrane area**
S. Grzegorczyn, A. Ślęzak

[27] - **Time and pressure characteristics of membrane potentials in non-homogeneous conditions for electrolyte solutions**
S. Grzegorczyn, A. Ślęzak

[28] - **Reversible deactivation of platelets induced by near infra red radiation**
K. Grzeszczuk, T. Walski, M. Komorowska

[28] - **Lysenin interaction with sphingomyelin-rich membranes – monomolecular layer technique and surface plasmon resonance studies**
M. Hereć, M. Kulma, W. I. Gruszecki, A. Sobota

[28] - **Changes of liposomal membrane fluidity induced by amyloid peptides. A spin label study**
M. Ionov, E. Olchowik, R. Gieniusz, A. Maziewski, B. Klajnert, M. Bryszewska, M. Zamaraeva

[29-43] – **Posters J-M**

[29] - **Poli(amido)amine dendrimer PAMAM G2.5 as a potential modulator of the intracellular calcium concentration**
A. Jarosz, M. Łabieniec

[29] - **Oxidative and nitrative modifications of plasma proteins isolated from breast cancer patients**
M. Kędzierska, B. Olas, J. Kołodziejczyk, B. Wachowicz, A. Jeziorski, J. Piekarski, U. Czernek, P. Podemski

[30] - **Age-related endocrine changes in the blood of Polish elderly people – the PolSenior study**
Kędziora-Kornatowska, J. Czuczejko, K. Szewczyk-Golec, M. Kozakiewicz, H. Pawluk, M. Mossakowska, B. Kłapcińska, J. Kędziora

[30] - **Induction of autophagic cell death in MCF-7 breast cancer cells treated with docetaxel**
K. Kochel, K. Matczak, A. Pieniążek, A. Koceva-Chyła

[30] - **Antioxidative properties of *Trifolium pallidum* extract**
J. Kołodziejczyk, J. Malinowska, B. Olas

[31] - **Effect of melatonin supplementation on the oxidative stress parameters under hyperbaric conditions**
M. Kozakiewicz, K. Kędziora-Kornatowska, K. Szewczyk-Golec, P. Siermontowski, R. Olszański, J. Czuczejko, J. Szypuła, J. Kędziora

[31] - **Fullerenol $C_{60}OH_{20–33}$ protects human erythrocyte membrane proteins from damage during storage**
A. Krokosz, J. Grębowski, A. Rodacka, M. Puchała

[32] - **Biophysical studies of the cap-binding ability and the structure stability of the vary-specific *Xenopus* eIF4E1b**
D. Kubacka, J. Stępiński, J. Jemielity, N. Minshall, N. Standart, E. Darżynkiewicz

[32] - **Antioxidant activity of new Cu(II) complex: dichloro-(3,5-dimethyl-N1-pyrazol-1-yl) and dichloro-(3,4,5-trimethyl-N1-pyrazol-1-yl) in patients with colorectal cancer**
K. Kubiak, K. Malinowska, Ł. Dziki, A. Dziki, I. Majsterek

[33] - **Antioxidative and biological activity of natural polyphenols from *Rosaceae* family**
A. Z. Kucharska, A. Sokół-Łętowska, A. Bąkowska-Barczak, K. Pyrkosz-Biardzka, A. Dudra, J. Gabrielka

[33] - **Comparison of selected parameters of oxidative stress in elderly patients with type 2 diabetes supplemented with prolonged-release melatonin**
D. Kupczyk, J. Rybka, K. Kędziora-Kornatowska, J. Motyl, J. Czuczejko, K. Szewczyk-Golec, M. Kozakiewicz, H. Pawluk, J. Kędziora

[34] - **Influence of ion channel inhibitors on circumnutations of *Helianthus annuus* stem**
A. Kurenda

[34] - **The effect of cadmium and lead on the membrane potential and photoelectric reaction of *Nitellopsis obtusa* cells**
R. Kurtyka, Z. Burdach, W. Karcz

[34] - **Mechanism of acrolein toxicity in the yeast *Saccharomyces cerevisia***
M. Kwolek-Mirek, R. Zadrąg-Tęcza, T. Biliński, G. Bartosz

[35] - **Yeast *Saccharomyces cerevisiae* as a model to study acrylamide toxicity**
M. Kwolek-Mirek, R. Zadrąg-Tęcza, S. Bednarska, G. Bartosz

[35] - **Mitochondria as target of toxic liver damage and pharmacological treatment**
E. A. Lapshina, V. T. Cheshchevik, I. K. Dremza, S. V. Zabrodskaya, I. B. Zavodnik

[36] - **Influence of passage number effect on cellular response to damage induction by proton irradiation**
E. Lipiec, A. Wiecheć, J. Dulińska-Litewka, J. Lekki, J. Wiltowska-Zuber, W. M. Kwiatek

[36]- **The effects of homocysteine and homocysteine thiolactone on the haemostatic activity of fibrinogen and plasminogen**
J. Malinowska, J. Kołodziejczyk, B. Olas

[37] - **Melatonin supplementation and its role in antioxidant status of patients with open angle glaucoma**
K. Malinowska, A. Kowalska-Bielecka, M. Kowalski, J. P. Szaflik, J. Szaflik, J. Kędziora, I. Majsterek

[37] - **Fluidity of liposome membranes doped with lipopolysaccharide (LPS 144): an ESR study**
A. Man, D. Man, M. Podolak, R. Słota, C. Ługowski

[37] - **Effect of selected phthalocyanines upon the dynamic properties of liposome membranes**
D. Man, G. Engel, R. Słota, A. Man, A. Michalska, Ł. Mach

[38] - **Molecular modeling of dye-labeled DNA oligonucleotides**
M. Markiewicz, A. Górka, P. Bonarek, A. Górecki

[38] - **Prooxidant activity of doxorubicin and paclitaxel in tumor cells**
K. Matczak, A. Pieniążek, A. Koceva-Chyła

[38] - **Oxidative stress induced by doxorubicin and paclitaxel in breast cancer cells**
K. Matczak, A. Pieniążek, A. Koceva-Chyła

[39] - **Spectroscopic studies of interaction of 1,3,4-thiadiazoles with lipid membranes**
A. Matwijczuk, A. Niewiadomy, G. P. Karwasz, M. Gagoś

[39] - **Sensitization of glioma cells to etoposide and ionizing radiation by inhibitor of DNA-dependent protein kinase – NU7441**
A. Merecz, E. Pastwa

[40] - **Assessment of apoptotic changes in human lymphocytes provoked by selected chlorophenolic compounds**
J. Michałowicz, K. Pawlicka, P. Sicińska

[40] - **Evaluation of oxidative DNA damage of human lymphocytes induced by chlorophenols and their derivatives**
J. Michałowicz, A. Surlit, I. Majsterek

[40] - **Interaction between phosphorus dendrimers and α-synuclein**
K. Miłowska, M. Małachowska, S. Sękowski, T. Gabryela

[41] - **Finding the relationship between micellization parameters and microscopic molecular properties using QSPR-like methods**
P. Misiak, B. Różycka-Roszak

[41] - **Influence of the lead compounds o the long range correlations in the current of ion channels**
J. Miśkiewicz, Z. Trela, S. Przestalski

[41] - **Electrical and thermal properties of lyophilized and irradiated human bone grafts**
J. Młynarski, J. Dec, S. Miga, S. Grzegorczyk

[42] - **Temperature dependence of the activation energy of viscous flow for hen egg-white lysozyme in aqueous solutions**
K. Monkos

[42] - **Translational diffusion coefficient for some mammalian serum albumins**
K. Monkos

[43] - **A glass-transition temperature for ovalbumin obtained from viscosity measurements and the Avramov's model**
K. Monkos

[43-57] – **Posters N-S**

[43] - **Molecular interactions between dl-α-tocopherol glycosidic derivative and DPPC in Langmuir monolayers**
G. Neunert, J. Makowiecki, R. Hertmanowski, T. Martyński, K. Polewski

[44] - **Pretransition and the main phase transition of DPPC membrane with canthaxanthin – Monte Carlo simulation**
W. Okulski

[44] - **Free radical scavenging activity and membrane stabilization by polyphenols from the sumac plant**
E. Olchowik, R. Gieniusz, A. Maziewski, M. Ionov, M. Bryszewska, M. Zamaraeva

[44] - **Electromagnetic radiation as a protective factor in osteoporosis prevention**
G. Olchowik, M. Tomaszewska, M. Tomaszewski

[45] - **Monitoring of changes of glycine structure under exposure to near infrared radiation – an ATR-FTIR spectroscopic study**
S. Olsztyńska-Janus, A. Nowosiad, M. Komorowska

[45] - **Cytotoxic effect of 3-methoxyflavone and 3-hydroxyflavone in human adenocarcinoma cell lines**
A. Palko-Łabuz, K. Środa, A. Uryga, E. Kostrzewa-Suslow, J. Dmochowska-Gładysz, K. Michalak

[46] - **Model eye lens membranes – how are they permeable to vitamin C? A spin label study**
T. Panz, A. Żuber, M. Lepiarczyk

[46] - **Characterization of dendriplexes formed by dendrimers and anti-HIV oligonucleotides**
E. Pędziwiatr, M. Ferenc, B Gabara, B. Klajnert, M. Bryszewska

[46] - **Combination of doxorubicin and docetaxel in free radical metabolism in rat liver – the effect of Pirolin**
A. Pieniążek, J. Czepas, J. Piasecka-Zelga, K. Matczak, K. Gwoździński, A. Koceva-Chyła

[47] - **DNA damage in MCF-7 breast tumor cells after treatment with doxorubicin and paclitaxel**
A. Pieniążek, I. Matys, A. Koceva-Chyła

[47] - **The effect of cholesterol on the phospholipid bilayer smoothness**
E. Pieniążek, W. K. Subczyński, M. Pasenkiewicz-Gierula

[47] - **Effect of temperature of sterilization on free radicals formation in sisomicin**
B. Pilawa, P. Ramos

[48] - **Interaction of selected natural polyphenol compounds of the anthocyanin group with biological and model membranes**
H. Pruchnik, D. Bonarska-Kujawa, H. Kleszczyńska

[48] - **A twofold role of liposomes in the protection against free radicals by natural antioxidants**
K. Pyrkosz-Biardzka, A. Dudra, J. Gabrielka

[49] - **EPR studies of free radicals in thermally sterilized sotalol**
P. Ramos, B. Pilawa, M. Ambrozik

[49] - **Phosphatidylcholine chlorohydrins induce caspase-3 dependent apoptosis**
A. Robaszkiewicz, G. Bartosz, M. Soszyński

[49] - **Physical principles of drug transport through a skin barrier – proposed model and verification**
P. Rochowski, J. Szurkowski

[50] - **Conformational changes in irradiated dehydrogenases determined on the basis of quenching of tryptophan fluorescence**
A. Rodacka, M. Kałużna-Kos, A. Krokosz, M. Puchała

[50] - **Induction of apoptosis by aclarubicin and doxorubicin in non-small lung cancer and liver cancer cells**
A. Rogalska, A. Gajek, Z. Jóźwiak, A. Koceva-Chyła

[50] - **Influence of the environmental pollution on the redistribution of light energy absorbed by needles of Scots pine**
K. Rok, J. Szurkowski

[51] - **Micellization study of new synthesized sugar surfactants**
B. Różycka-Roszak, H. Pruchnik, P. Misiak, B. Jurczak, K. A. Wilk

[51] - **Circular dichroism spectroscopy and isothermal titration calorimetry studies of interaction between G3.5 PAMAM and G4 polyamidoamine succinamic (PAMAM-SAH) dendrimers with human serum albumin**
S. Sękowski, A. Buczkowski, B. Pałecz, T. Gabryelak

[52] - **Simple models for the gene auto-repression and auto-induction**
J. Sielewiesiuk

[52] - **Formation of AGEs in the presence of PAMAM dendrimers**
K. Siewiera, M. Łabieniec

[52] - **Effect of non-modified and surface-modified nanodiamond powders on the viability and ROS production by human endothelial cells**
K. Solarska, A. Gajewska, J. Skolimowski, G. Bartosz, K. Mitura

[53] - **Arthropod toxins modulating sodium channel function as insecticides**
M. Stankiewicz, J. Ciołek, N. Gilles

[53] - **Oxidative stress in erythrocytes from healthy people subjected to cryotherapy**
A. Staroń, G. Mąkosa, R. Cierpiał, M. Koter-Michalak

[53] - **The filtration coefficients L_{pr} of isolated roots: a mechanistic description**
G. Suchanek

[54] - **Cross coefficients in the Kedem-Katchalsky equations**
G. Suchanek, B. Cisowska

[54] - **The comparison of toxic effect of bromfenvinphos and chlorfenvinphos on human erythrocytes**
B. Szatkowska, B. Bukowska, W. Duda, B. Huras

[55] - **Changes in viability, morphological and apoptotic parameters of human peripheral blood lymphocytes exposed to bromfenvinphos and its impurities**
B. Szatkowska, B. Bukowska, J. Michałowicz, B. Huras, P. Sicińska

[55] - **Biological effects of irradiation of rat blood vessel cells with 308 nm pulses of Xe-Cl excimer laser: design of experiment and first results**
G. Szatkowski, D. Dziczek, B. W. Chwirot

[55] - **ATP concentration changes in thermotolerant erythrocytes**
M. Szewczyk, P. Duchnowicz, M. Koter-Michalak

[56] - **Melatonin level and the antioxidative enzymes activities in the blood of coronary catheterrization patients**
K. Szewczyk-Golec, T. Ługowski, P. Grzelakowski, J. Czuczejko, M. Kozakiewicz, H. Pawluk, K. Kędziora-Kornatowska, J. Kędziora

[56] - **Application of photoacoustic spectroscopy in ecology**
J. Szurkowski

[57] - **Accumulation and cellular distribution of doxorubicin – transferrin conjugate in peripheral blood lymphocytes**
M. Szwed, M. Jędrzejczyk, Z. Jóźwiak

[57] - **Induction of apoptosis by doxorubicin – transferrin conjugate in human erythroleukemia cells**
M. Szwed, M. Jędrzejczyk, Z. Jóźwiak

[57] - **May the near-infrared radiation (NIR) destabilize the DNA molecule?**
K. Szymborska-Małek, M. Komorowska

[57-68] – **Posters Ś-Ż**

[57] - **Model equations of the membrane transport of non-electrolyte solutions with concentration polarization**
A. Ślęzak, S. Grzegorczyk

[58] - **Simvastatin as inhibitor of human adenocarcinoma cancer cell growth and lipid phase perturbing agent**
K. Środa, A. Palko-Łabuz, A. Uryga, K. Michalak

[58] - **Pirolin influences antioxidant enzyme activities in heart tissue of rats bearing experimental breast tumors and treated with anticancer drugs doxorubicin and docetaxel**
S. Tabaczar, M. Talar, J. Czepas, J. Piasecka-Zelga, A. Koceva-Chyła, K. Gwoździński

[59] - **Structural changes in the bone tissue of pregnant female rats treated with caffeine**
E. Tarnowska-Sokołow, G. Olchowik, M. Tomaszewski, M. Tomaszewska

[59] - **Studies on the influence of selected plant-derived compounds on the activity of voltage-gated potassium channels Kv1.3**
A. Teisseyre, J. Bronowicka, K. Michalak

[59] - **NMR study of the mode of interaction of neurotoxic divalent cation (Mn^{2+}) with polysialic acid**
A. Timoszyk, K. Wilkosz

[60] - **Slowly activating vacuolar channels (SV) in the presence of trimethyltin chloride**
Z. Trela, W. Karcz, S. Przestalski

[60] - **Calorimetric evaluation of peritoneal tissue in surgical patients**
H. Trębacz, K. Torres, A. Chrościcki

[61] - **Effect of collagen glycation on the stability of organic phase in bone tissue**
H. Trębacz, K. Wójtowicz, W. Dyś, T. Gieroba, E. Wlizło

[61] - **The effect of NIR pulse sequence and energy on erythrocyte susceptibility to oxidative stress**
T. Walski, K. Grzeszczuk, M. Komor

[61] - **Influence of cationic phosphorus-containing dendrimers on amyloid peptide fragment Aβ 1–28 studied by FT-IR**
T. Wasiak, M. Granell, J. Cladera, J. P. Majoral, B. Klajnert, M. Bryszewska

[62] - **Influence of antibiotic drug amphotericin B on lipids in liposome investigated with using fluorescence anisotropy**
P. Waśko, W. I. Gruszecki

[62] - **Differential interaction of 8-prenylnaringenin with zwitterionic phosphatidylcholine and charged phosphatidylglycerol bilayers**
O. Wesołowska, J. Bronowicka-Gąsiorowska, K. Michalak

[63] - **Free radicals in beta-lactam antibiotics sterilized by gamma irradiation**
S. Wilczyński, B. Pilawa, R. Koprowski, Z. Wróbel, M. Ptaszkiewicz, J. Swakoń, P. Olko

[63] - **The effect of aclarubicin (ACL) on human erythrocytes**
Witczak, A. Matusiak, A. Marczak

[63] - **Inhibition of oxidation of membrane lipids by hawthorn extracts**
Włoch, J. Oszmiański, H. Kleszczyńska

[64] - **Effect of incorporated dendrimers on thermotropic parameters of DMPC/DPPG liposomes**
D. Wróbel, H. Mourelatou, M. Ionov, J. P. Majoral, B. Klajnert, C. Demetzos, M. Bryszewska

[64] - **Extrinsic luminophores in the examination of neurodegenerative diseases**
A. Wypijewska, B. Sikora, J. Gałązka-Friedman, E. R. Bauminger, Z. K. Wszolek, K. J. Schweitzer, D.W. Dickson, A. Jaklewicz, A. Baranowska-Korczyc, D. Elbaum, A. Friedman

[65] - **A biophysical view of mRNA cap binding by *C. elegans* DcpS**
A. Wypijewska, J. Żuberek, E. Bojarska, A. M. Rydzik, J. Jemielity, E. Darzynkiewicz

[65] - **Types of paramagnetic centers in melanin complexes with netilmicin**
M. Zdybel, B. Pilawa, E. Buszman, D. Wrześniok, R. Krzyminiewski, Z. Kruczyński

[66] - **Paramagnetic centers in vertebrae of newborn rats**
M. Zdybel, B. Pilawa, K. Michalik, Z. Drzazga

[66] - **Toxicity of polypropylenimine dendrimers with various degree of sugar modification**
B. Ziemba, A. Janaszewska, K. Ciepluch, M. Krotewicz, W. A. Fogel, D. Appelhans, B. Klajnert, M. Bryszewska

[66] - **Kinetic parameters of butyrylcholinesterase in blood plasma samples of patients with metabolic syndrom**e
A. Ziobro, M. Broncel, M. Koter-Michalak

[67] - **Changes in erythrocytes in the youth with dyslipidemia**
A. Ziobro, E. Rapacka, P. Duchnowicz, M. Koter-Michalak

[67] - **Kinetic parameters of butyrylcholinesterase in the plasma of youth with dyslipidemia**
A. Ziobro, E. Rapacka, P. Duchnowicz, M. Koter-Michalak

[68] - **The specific blue-light-effect on the singlet excitations quenching in protein complex LHCII**
M. Zubik, R. Luchowski, W. Grudziński, M. Gospodarek, J. Szurkowski, Z. Gryczynski, I. Gryczynski, W. I. Gruszecki

[68] - **Conformational changes of peptides in the erythrocyte membrane induced by organometallic tin compounds**
R. Żyłka, J. Kupiec, S. Przestalski

[69-72] - **Author index**
